THE PERFECTION of MECHANISM.—
AMERICAN IMPROVEMENT IN WATCHES.
These WATCHES are manufactured on the same system that has made American firearms the best in the world. It substitutes the precision and rapidity of machinery for the skill of handleraft. The factory consists of a complete series of machines, devised and made expressly for this establishment, each of which works true to the thousandth part of a half, turning out its own particular part, so as to be an exact fit in any one of a thousand Watches. High skill with good luck may equal such work, now and then, but must fail generally, and siways is dearer. The same of repair is obvious, because the manufacturers have always on hand parts to replace any that may be lamaged. Their simplicity and stability of structure reader hese watches the least liable to get out of order, and they are youndently recommended as superior in every respect, and specially in the correctness of their Time, to imported Watches of the same price. As soon as their merits are known, seeple will no more think of importing docks or pistols with that view.
